TROUBLESOME PAINS AND ACHES

While Rheumatism is usually worse in Winter because of the cold and ampness of a changing atmosphere, it is by no means a Winter disease ntirely. Persons in whose blood the uric acid, which produces the disase, has collected, feel its troublesome pains and aches all the year round. The cause of Rheumatism is a sour, acid condition of the blood, brought about by the accumulation in the system of refuse matter, which the natural avenues of bodily waste have failed to carry off. This refuse matter coming in contact with the different soids of the body, forms uric acid which is absorbed by the blood and distributed to all parts of the body, and Rheumatism gets possession of the system. Rheumatic persons are almost constant sufferers; the nagging pains in joints and muscles, are ever present under the most favorable climatic conditions, while exposure HEN the Bowels are filled to dampness or an attack of indigestion will often bring on the severer with undigested food we symptoms even in warm, pleasant weather. Liniments, plasters, lotions, may be a great deal ware etc., relieve the pain and give the sufferer temporary comfort, but are in

no sense curative; because Rheumatism is not a disease that can be rubbed away or drawn out with a plaster. S. S. S. is the best treatment for Rheumatism; it goes down into the blood and spacks the disease PURELY VEGETABLE, at its head, and by neutralizing the acid and driving it out, and building up the thin, sour blood, cures Rheumatism permanently. Being made entirely

of roots, herbs and barks, S. S. S. will not injure the system in the least. Book on Rheumatism and any medical advice without charge, THE SWIFT SPECIFIC CO., ATLANTA, CA.
